As a recently graduated Information Systems based in Lund, I focus on design engineering, where UX/UI meets front end development. My approach balances sixty percent artistry and forty percent engineering allowing me to shape concepts that make sense for users and translate smoothly into code. I currently serve as part time lead designer at PhaseOneAI while building my portfolio site from the ground up to sharpen both creative and technical skills. I specialise on turning user requirements into clear design ideas and functional prototypes that deliver tangible value. If you hire me you will gain an employee who is detail oriented, proactive and endlessly curious.

EXPERIENCE

Design Lead (Part time)

🏢 PhaseOneAI

📅 Jul. 2025 – Currently

- Redesigning the company website by replacing a current Framer template with a custom layout, drafting new page structure and wireframes.
- Building the groundwork for a simple design system cataloguing colours, typography and a few starter components in Figma while learning token-based methods.
- Re-vectorised the logo to SVG in affinity designer and produced LinkedIn banner graphics for leadership to improve brand consistency across web and social channels.
- Set up Notion boards and task lists to track design work and keep the small team aligned.

IT consultant intern

🏢 The Port of Gothenburg

📅 Nov. 2023 – Jan. 2024

- Worked in a four-person team to review the port’s legacy software tools and shortlist commercial alternatives that met the client’s security and cost targets.
- Sketched new interface ideas in Figma and built a clickable prototype with HTML, CSS and vanilla JavaScript to as a tailored alternative.
- Delivered a written report and a short video walkthrough summarising findings, recommendations and next steps for internal stakeholders.

SKILLS

UX Design

Data analysis, User Research, User testing, Teamwork, Wireframing, Prototyping, Responsive design, AB testing.

Programming

HTML, CSS, Python, SQL, Flutter.
Still learning: Tailwind CSS, Three.js, Next.js, React.js, Motion, GSAP.

Tools

Figma, affinity design, affinity photo, Figjam, Webflow, Tableau, Flutter, MySQL, Slack, Github, Lucid Chart, Spline.

Others: Splice, Ableton, Davinci resolve

Languages

English (Fluent), Swedish (Fluent), French (Mother-tongue).

Additional Ownership

Swedish Class B driver’s License.

EDUCATION

B.Sc of Science with a major in informatics - Systemvetenskap/Information systems

- Designed and built AI enhanced fitness logger using Flutter with GPTo4 API integration.
- Worked on basic machine learning classification and regression projects using Keras.
- Coded base HTML frames for web development as a side project.
- Handled and constructed databases in MySQL, SQLite3 and Beekeeper studio, both side projects and backend data handling/processing.
- Creating dashboards using Tableau, utilising food waste in public sectors dataset from the Swedish municipality of Umeå
- Sketching website and system function architecture within Figma and smaller parts in LucidChart.
- Personal Portfolio in development focusing on UI UX elements, front-end development and other side projects, expected to be completed by the end of october 2025.

🏢 University of Gothenburg

📅 2022 - 2025

IB Diploma

- Higher level Business and Management / Economics/ English studies

🏢 Katedralskolan, Lund

📅 2019-2021

PORTFOLIO WORK

Moodrobe: [Link to prototype](#)

- Mid-level fidelity prototype, LLM enhanced Fashion discovery tool as part of a university project idea.

BOGO: (in development)

- Web-based platform allowing rental housing between tenants and landlords to connect in Gothenburg area. Full case study and platform in development.

More in the works...
